Some positive things about the game updates have been great for a wonderful!!!! People have enjoyed them dearly, although this new update is annoying people and I've heard that not many people are going to play due to the fact that the update isn't very well-made. Of course, it may be OP and cool, but for so many, it really isn't. The update itself is absolutely terrible, there is no point in fighting and pvping and having fun when it is now harder and more annoying to deal with others. I thought I'd never be unhappy with my favorite game, but now I really am. It's not a good upgrade and it's more confusing than enjoyable. Overall, I hope this game could just go back to the way it was rather than add useless stuff like, (Your time for more XP, adding more HP just to make you work harder for not Reason. I've only been getting so many friend requests because of the fact that we all agree the update is nothing but a bad update. I've been through it, and... I'm probably retiring from this game. I feel that you should consider this review, not many people are satisfied. I wish this game would just go back to the old way if possible. Not a good update at all. I apologize, but that's a lot of people's opinions. QR Code Download APK (82.71 MB) Wolf Simulator Evolution Like games about animals where you feel like a real beast?
